Posters

Einarsen C, Kvistad KA, Håberg A, Moe HK, Vik A, Skandsen T

A2 Levels of blood biomarkers in patients with MTBI were related to acute injury severity, but not to the post-concussive symptoms
Skandsen T, Clarke GJ, Einarsen CE, Vik A, Feyling C, Zetterberg H, Blennow K, Håberg AK

A3 Prospective study of Glial fibrillary acidic protein and Neurofilament light from acute to 12 months after mild traumatic brain injury
Skandsen T, Clarke G, Vik A, Follestad T, Einarsen C, Zetterberg H, Blennow K, Håberg AK

A4 Molecular imaging of neuroinflammation in patients after mild traumatic brain injury; a longitudinal 123I-CLINDE SPECT study

B1 Perceived injustice after mild traumatic brain injury: a prospective follow-up study
Mäki, K, Nybo, T, Hietanen, M, Melkas, S

B2 Labour market attachment after mild traumatic brain injury: nationwide cohort study with 5-year register follow-up
Graff HJ, Siersma V, Møller A, Kragstrup J, Andersen LL, Egerod I, Malá H

B3 Pre-morbid risk factors predicting labour market attachment after mild traumatic brain injury: a national register study
Graff HJ, Siersma V, Møller A, Kragstrup J, Andersen LL, Egerod I, Malá H

B4 Early intervention for impairing post-concussion symptoms in adolescents and young adults: results from a randomized trial
Thastum MM, Rask CU, Nørst-Nielsen AT, Tuborgh A, Frederiksen O-V, Jensen JS, Svendsen SW, Nielsen JF, Schröder A

C1 Attachment style and symptom reporting in young persons with concussion
Tuborgh, Svendsen SW, Schröder A, Hunter J, Rask CU

C2 Attentional difficulties following pediatric mild traumatic brain injury
Saarinen M, Erkinjuntti N, Isaksson N, Virtanen S, Himanen L, Tenovuo O, Lähdesmäki T

C3 Child-focused rehabilitation of concussion
Fjeldborg L, Reimers SH
